ARMAN MISHRA

PENETRATION TESTER | WEB, INTERNAL NETWORK & ACTIVE DIRECTORY

contact@armanmishra.in | armanmishra.in | github.com/enkidudev | LinkedIn

SUMMARY

CPTS- and PJPT-certified penetration tester with two paid critical bug bounty findings (admin takeover, remote code execution), 100% of HTB Dante and the CPTS path, and 90% of RastaLabs. Hands-on with web/API testing, internal networks and Active Directory compromise, plus evidence-based reporting. BCA Cyber Security student seeking a penetration testing or red team internship.

CERTIFICATIONS

HTB Certified Penetration Testing Specialist (CPTS) | Verify — Nov 2026

TCM Security Practical Junior Penetration Tester (PJPT) | Verify — 2026

SECURITY RESEARCH & BUG BOUNTY

Independent Vulnerability Research — Private programs

- Submitted 5+ vulnerability reports: **2 critical, both paid**, plus responsible disclosures to organizations without formal programs, all remediated and acknowledged.
- **Critical remote code execution.** Confirmed in a confidential private program.
- **Critical administrative access.** Confirmed in a separate confidential private program.

HackVerse / ScriptJackers member — Oct 2026

- Designed and shipped 7 CTF challenges (4 forensics, 3 boxes) from medium to extreme difficulty, with containerized infrastructure and verified solve paths.

LAB ASSESSMENTS

- **HTB Dante (100%), RastaLabs (90%), CPTS path (100%):** multi-host web, network, Linux/Windows and AD assessments covering pivoting, privilege escalation and domain compromise; delivered an evidence-based CPTS examination report.

PROJECTS

Shredder — Python recon automation | github.com/enkidudev/shredder

- Chains RustScan discovery with Nmap/NSE fingerprinting, ranks findings by investigation priority, and produces an HTML report from a single target input with configurable scan profiles.

Custom Active Directory Lab — Hand-built

- Built a 3-host lab by hand (Windows Server 2019 DC, 2x Windows 10), then exploited it end-to-end via Kerberoasting, LLMNR poisoning, NTLM relay, LNK abuse and privilege escalation.

Ink | Offline Security Field Manual — Private projects

- Ink: SQLite-backed CLI assessment notebook tracking credentials, validation status and reuse, with HTML export. Field Manual: searchable reference of playbooks, command references, case studies and reporting workflows.

CTF COMPETITIONS | 2025-2026

- **1st, ROOTBREACH CTF (NITJ), team, 300+ teams.** Other wins: Encrypted (2025), CYBERWAR, QuickHeal BCA (solo), CYBERTHON, Digital CyberHunt.
- Podium: 2nd Tech Fusion and EXPLOIT 404; 3rd Trivarna. 4th at RCS CTF 2026, competing solo in a team-format event.

TECHNICAL SKILLS

- **Recon & enumeration:** Nmap, RustScan, Masscan, ffuf, Nuclei
- **Web/API:** Burp Suite, SQLmap
- **AD & internal:** NetExec, Impacket, BloodHound, Certipy, Responder, Metasploit; pivoting with Ligolo-ng
- **Development:** Python, Bash, C, C++, SQLite; Linux and Windows

EDUCATION

Lovely Professional University | BCA, Specialization in Cyber Security | CGPA 9.02 — Expected 2028
